ume 14 No. 40 — Hyattsville, Maryland 20782 — October 7, 1966

WHEAT AND SOYBEANS CONTINUE DECLINE

Cash grain markets were again featured by sharp losses in wheat and soybean prices during the week ended October 6. Feed grains were mostly on the steady to higher side with the exception of grain sorghums which were lower.

Winter wheat declined 5-6¢ per bushel reflecting the slow export demand and the drop in futures prices. Kansas City prices were 25¢ below the season's high point early in September. Producer selling was slow but elevator offerings increased. Planting of the new crop continued active with around three-fourths seeded in Kansas. Spring wheat was unchanged to 3¢ lower with the loss at the lower end of the protein bracket. Mill demand was strong with grinding at near capacity levels. Durum wheat was down 5¢ with demand less urgent. White wheat declined 2¢ in the Pacific Northwest due to lack of export buying. Rye held steady reflecting very light receipts at Minneapolis.

Corn was unchanged to 2¢ higher with a fairly good demand for the light offerings. Cool wet weather slowed maturity and harvest. Oats were unchanged to a penny higher as limited supplies were quickly absorbed. Barley went up 2¢ on an average with light receipts at Minneapolis and good export business in the Pacific Northwest. Grain sorghum declined 2¢ per cwt. with harvest active in most areas.

Soybeans dropped 8¢ per bushel during the week and closed more than $1.00 lower than the high in August. Cash prices followed the declining futures despite the fair demand for light receipts. Flaxseed held steady with arrivals sharply below last week.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

1/ July 1, 1965-September 30, 1966 for wheat, rye, oats, barley, and flaxseed; October 1, 1965-September 30, 1966 for grain sorghum; and September 1-30, 1966 for soybeans.

The Agricultural Stabilization and Conservation Service reported value, as of September 30, 1966, of feed grain certificates issued for crop-years 1964, 1965, and 1966 was $3,271,078,034. Sales against the certificate pools, by crop year were: 1965, $120,884,880; and to date in 1966, $871,466. These sales left a combined feed grain certificate value of $3,149,321,688 as of August 31, 1966.

Volume 14 No. 41 Hyattsville, Maryland 20782 October 14, 1966

WHEAT PRICES HIGHER - CORN AND SORGHUM LOWER

Cash grain markets were featured by a reversal of the downtrend of wheat and soybeans as prices generally advanced during the week ended October 13. Wheat in the Pacific Northwest, corn and grain sorghum declined while other grains showed little change.

Winter wheat advanced 3-4¢ per bushel reflecting the improved export and domestic demand. With little or no wheat offered by farmers available supplies were light. Seeding of the new crop was nearly complete over most of the western half of the country. Spring wheat advanced 1-3¢ reflecting somewhat smaller offerings. Flour business was light. Durum declined 2¢ for choice varieties. White wheat dropped 10¢ in the Pacific Northwest with limited buying interest. Rye advanced 2¢ per bushel at Minneapolis as receipts dropped.

Corn prices dropped 5¢ per bushel at Chicago and 1-2¢ at most other Midwest points as harvest progressed in most areas and nearly all the acreage safe from frost. October prospects were little changed from September. Export interest continued moderate. Oats held steady as limited offerings were easily absorbed. Barley was unchanged with slow demand for the lower qualities. Grain sorghum prices declined 2-5¢ per cwt. as harvesting of the record crop spread to larger areas. The new crop now forecast at 728 million bushels is 9 percent more than last year.

Soybeans advanced 2¢ per bushel despite increased offerings from the harvest which is now making rapid progress in most of the Corn Belt. Most arrivals were on previous commitments but crusher and export interest was active. Oil and meal held steady. Flaxseed held steady with receipts light at Minneapolis.

CORN EXPORTS ... totaled a record 661 million bushels during the 1965-66 crop year on the basis of inspections for export. This is 115 million more than the previous record for 1964-65 and nearly double the five-year (1960-64) average of 348 million. Exports to the principal countries in million bushels were as follows: Netherlands 111.4; Italy 101.1; United Kingdom 92.4; Japan 92.0; Spain 67.9; and West Germany 60.2. Exports of grain sorghum totaled 258 million bushels -- an increase of 111 million over the previous record for 1964-65. Japan was our largest customer, taking nearly 76 million bushels. India took 56 million while Netherlands imported nearly 38 million bushels. West Germany and Belgium each took around 23 million bushels.

WHEAT SUPPLIES ... on October 1 for milling, export or carryover totaled 1,338 million bushels compared with 1,582 million a year ago and 2,053 million the 5-year (1960-64) average. Smaller supplies reflect the sharp drop in the carryover and the slightly smaller crop. Exports of wheat, grain only, totaled 207 million bushels the first quarter -- an increase of 20 million over the same period last year.

Grains: Export prices basis prompt or 30-day shipment, October 13, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Volume 14 No. 42 Hyattsville, Maryland 20782 October 21, 1966

GRAIN PRICES HIGHER

Cash grain markets strengthened during the week ended October 20. Wet weather slowed marketing of corn and soybeans, while export and domestic demand generally improved. Prices of most grains advanced.

Hard winter wheat advanced 1-2¢ per bushel, while soft red winter gained 2-5¢. Demand for good milling quality wheat was excellent with increased flour milling. Export trading picked up. Farm selling continued light. Seeding of the 1967 crop was virtually complete in the western half of the country. Spring wheat gained 2¢ as offerings remained light. India purchased 3.5 million bushels of spring wheat during the week. Durum wheat advanced 7¢ with increased export activity. White wheat went up 7¢ in the Pacific Northwest reflecting increased export orders and slow country selling. Rye was unchanged in a dull market with only limited receipts.

Corn advanced 2-3¢ per bushel due in part to very light producer marketings. Harvest continued behind normal, slowed by high moisture content. In Illinois, harvest was only 15 percent complete. Oats gained a penny, reflecting good demand from mills and feed outlets. Barley was mostly unchanged in a slow market. Grain sorghum prices were 1-2¢ per cwt. higher with a good steady demand for light offerings.

Soybeans advanced 8-10¢ with a good demand from both processors and exporters. Despite the active harvesting of the record crop, offerings by producers were limited. In Illinois, harvest was 80 percent complete, ahead of 1965 but behind normal. Flaxseed held steady with receipts light at Minneapolis.

Special Features

Wheat - quantity put under price support by States	10
Grains - quantity outstanding under price support reseal loans by States	11
Grains - quantity under price support	12

PRICE SUPPORT OPERATIONS THROUGH SEPTEMBER 30 ... show that farmers put only 76 million bushels of 1966-crop wheat under loan. This is a third less than 113 million put under at the same time last year. By the end of September farmers had put 7.2 million bushels of barley and 11.2 million of oats under loan as against 8.5 million bushels of barley and 20.3 million of oats from the 1965 crop by the comparable date. The quantity of corn under reseal loan at the end of September totaled 280 million compared with 366 million on September 30, 1965.

1967 FEED GRAIN PROGRAM ANNOUNCED ... as basically the same as in previous years. The main changes will be a higher loan rate, higher total price support and elimination of voluntary diversion for payment except on small farms. Farmers are encouraged to divert 15-18 million acres as compared with 30 million in 1966. The price support loan for corn is increased from $1.00 to $1.05 while the diversion payment stays at 30¢ per bushel. For grain sorghum the loan is increased from $1.52 to $1.61 per cwt. and the payment stays at 53¢ per cwt. The 1967 crop price support loan levels will be 90¢ per bushel for barley, 63¢ for oats and $1.02 for rye. This is an increase of 10¢ for barley and 3¢ for oats while the loan rate for rye is the same as for 1966.

Grains: Export prices basis prompt or 30-day shipment, October 20, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

Grain Market News

QUARTERLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 9 No. 4 Hyattsville, Maryland 20782 October 27, 1966

Grain prices declined in October reflecting in part the shift to a new-crop basis for corn and soybeans and the smaller export demand for wheat. Prices climbed sharply in July and August with soybeans advancing to near record levels. Despite the loss prices in October were well above a year ago. Wheat stocks were the lowest since 1952 while stocks of feed grains were 20 percent below last year. Rye stocks were at the highest October 1 level since 1955.

WHEAT ... prices advanced early in the summer and stayed at a relatively high level until the middle of September, due in part to very light offerings by producers. Prices declined sharply the last half of September and in October reflecting the slackening in export demand, reaction to the high price level and to harvesting of a record world wheat crop. Winter wheat prices in October averaged 16-18¢ below the July level while spring wheat declined 4-7¢ per bushel. Compared with a year ago October prices ranged from 13¢ higher for soft red winter, 19¢ for hard winter to 23¢ for ordinary protein spring wheat. With good export demand durum wheat averaged about 50¢ per bushel above last year. Stocks of wheat in all positions on October 1 totaled 1,440 million bushels -- a drop of 268 million from a year earlier. Commodity Credit Corporation owned 300 million bushels this October 1 as against 626 million a year ago. Exports of wheat, grain only, July through September totaled 200 million -- 13 million more than in 1965. The quantity of wheat milled for flour and flour exports were about the same as last year. On the basis of increased seeding due to the expanded 1967 acreage, the balance remaining for feed totaled only 12 million bushels as against 77 million fed the first quarter of 1965-66. The higher wheat prices tended to discourage heavy feeding of wheat. Wheat supplies in Canada total a record 1,263 million bushels as farmers harvested the largest crop in history.

RYE ... declined 6¢ per bushel at Minneapolis during the July-October period but finished 3¢ above a year ago. Stocks of 38 million bushels in all positions October 1 were 6 percent above last year. Disappearance of 8.7 million the first quarter was 2 million less than in the comparable quarter of 1965 with the principal drop in feed usage. Exports of 755,000 bushels were about the same as last year while the 0.9 million used for alcohol and the 1.3 million milled for flour were about 100,000 higher. Supplies of rye in Canada for 1966-67 totaled 25.7 million as against 25.0 million for 1965-66.

CORN ... prices advanced steadily during July and August due in part to record exports and some fear regarding prospects of the new crop. With assurance of a record crop and a slackening in demand at the higher level prices declined in October. Despite the loss, prices in October averaged around 18¢ per bushel above a year earlier. A crop of 4.1 billion bushels was indicated on October 1 -- 2 percent less than the 1965 crop but 9 percent above average. Carryover stocks on October 1 were the smallest since 1953 and totaled 866 million as against 1,170 million a year earlier. About 550 million bushels were owned by CCC or under price support compared with 933 million on October 1, 1965. Disappearance of corn last season totaled 4,476 million reflecting record commercial usage, exports and domestic feeding. Exports, grain only, of 667 million were 117 million more than the previous record while wet milling totaled 204 million, a gain of 2 percent over the year before. The balance remaining for feed of 3.4 bil. was 0.4 bil. more than in 1964-65. Animal units for 1965-66 are estimated at 169.2 million compared with 167.7 million for 1964-65. Feeding of corn per animal unit totaled 20.3 bushels last season as against 18.1 for 1964-65 and 18.5 the 5-year average.

OATS ... generally held firm during the first quarter of the season reflecting the smaller supplies. Prices in October ranged 5-8¢ per bushel above a year ago. Stocks of oats in all positions at 861 million were the smallest in over 20 years, and 9 percent less than last year. First quarter disappearance of 298 million was about the same as last year. Exports totaled 6 million as against 9 million a year earlier. Canadian supplies of 511 million for 1966-67 are 34 million less than for 1965-66.

BARLEY ... prices advanced 3-11¢ per bushel in the first quarter due in part to the smallest crop since 1956. Prices in the Pacific Northwest advanced less than in California or in the Midwest. Choice malting barley averaged 10¢ per bushel above a year ago during October. Stocks in all positions totaled 388 million, a drop of 3 percent from last year. Disappearance of barley the first quarter totaled 113 million which was slightly below a year earlier. Exports at only 9 million were 7 million below the previous year while industrial usage, mainly beer and alcohol, was about the same. Barley supplies in Canada for 1966-67 are estimated at 385 million, the largest of record.

GRAIN SORGHUM ... prices declined 17¢ per cwt. in the July-October period as prospects for a record crop materialized. Prices in October were at about last year's level. A crop of 408 million cwt. (728 million bushels) was indicated on October 1 -- 9 percent above last year and 35 percent above average. Carryover stocks totaled 220 million cwt., which was 100 million below a year earlier. Supplie for 1966-67 amount to 627 million as against 691 million for 1965-66. Disappearance of 471 million cwt. last season was 150 million more than in 1964-65. Exports hit a record high of 145 million cwt. while feeding amounted to 318 million.

SOYBEAN ... prices advanced to $4.00 per bushel in July at Chicago and remained at a high level until September when prospects for the record crop were confirmed. Soybeans averaged $2.97 the first three weeks of October. October 1 conditions indicated a 1966 crop of 927 million bushels - an increase of 10 percent over last year. (Supply and distribution table on a September basis is shown on page 10 of this report).

FLAXSEED ... prices at Minneapolis averaged 11¢ per bushel above a year ago the first quarter of the season and in October were 19¢ above last year. Stocks on October 1 of 29 million were 18 percent less than a year earlier but slightly above average. First quarter crushings of 4.8 million were below last year while exports of 2.8 million were about double the same period of 1965. Canadian supplies of 34.5 million bushels for 1966-67 compares with 36.4 million for 1965-66.

GRAINS: MONTHLY AVERAGE CASH PRICES

(All prices in cents per bushel except grain sorghum in cents per cwt.)

Grain Market News

GRAIN DIVISION CONSUMER AND MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 43 Hyattsville, Maryland 20782 October 28, 1966

GRAIN PRICES GENERALLY DECLINE

Cash grain prices generally declined during the week ended October 27. Favorable harvesting weather brought increased marketing of corn and soybeans, while a weak export market lowered wheat prices. Other grains were about unchanged.

Winter wheat declined 2-3¢ per bushel reflecting the less active export demand and some increase in terminal elevator offerings. Country offerings continued light, while mill demand was only moderate. Spring wheat declined 4¢ due in part tc uncertainty regarding export demand. Receipts were light with producers holding tightly. Demand for high protein kinds improved with a gain of a penny in the permium. Demand for durum was less aggressive and prices slipped 6¢ per bushel. White wheat dropped 4¢ per bushel in the Pacific Northwest despite fair export sales. Country selling was reported as poor to fair. Rye was down a penny with the market weak.

Corn prices dropped 4-6¢ per bushel at most terminals but only a penny at Omaha. Harvest gained momentum and increased supplies were offered. Most offerings were relatively high in moisture content. Oats gained a penny at Chicago but lost about that much at Minneapolis in a rather slow market with light receipts. Barley was mostly unchanged but the average sales at Minneapolis were slightly below last week. Prices declined 3¢ at Portland. Grain sorghum went up 2¢ per cwt. with a good demand for the increased marketings.

Soybeans dropped 8-9¢ per bushel with harvest in Illinois around 85 percent complete. Producer selling increased with supplies from the record crop ample for current needs. Exports increased with demand moderate. Flaxseed was unchanged with receipts light at Minneapolis.

1 Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2 Simple average of daily closing prices.

3 Non-transit from the East.

Grain Market News

GRAIN DIVISION — CONSUMER AND MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 44 Hyattsville, Maryland 20782 November 4, 1966

MOST GRAINS HIGHER

Cash grain markets generally strengthened during the week ended November 3. Winter wheat, corn, soybeans and rye closed above a week ago while spring wheat and barley were on the weak side.

Winter wheat advanced 2-3¢ per bushel at the close reflecting improved export demand and some concern regarding available supplies. Part of the increase was due to a reaction from the downward trend of recent weeks. Farm and country elevator selling continued slack. Spring wheat at Minneapolis was down fractionally with the advance at the close about offsetting the early weakness. Flour was selling lower and demand was slow. Strength in wheat at the close reflected the better corn market. Demand for durum remained moderate. White wheat lost a penny in the Pacific Northwest with smaller export demand and light country selling adequate for the needs. Rye went up 5¢ reflecting the smaller receipts.

Corn advanced 3-4¢ despite increased receipts from active harvesting. Strength stemmed in part from large expected exports, heavy domestic use and low government stocks. Oats held steady with moderate demand for light receipts. Barley was unchanged to 2¢ lower in a slow market. Grain sorghum declined 1¢ per cwt. on heavy arrivals at Kansas City but strengthened at Ft. Worth.

Soybeans advanced 4¢ per bushel reflecting continued good export demand and rather limited producer selling. Crusher interest was moderate with both oil and meal on the weak side. Flaxseed was unchanged at Minneapolis.

Morocco	Oct. 26	-	Wheat and Wheat Flour	2.6 mil. bu.	4,400

CCC WHEAT SALE TO ITALY ... was announced this week of 1,837,200 bushels for $2.48 million, primarily for use in school lunch programs for needy children. This sale was made under the Commodity Credit Corporation Charter Act. The authority provides for sales, at less than world market prices, of agricultural commodities for specified purposes such as feeding needy children or starting and maintaining school lunch programs in foreign countries. The price of wheat sold to Italy was $1.35 per bushel.

Grains: Export prices basis prompt or 30-day shipment, November 3, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley or Grain
	Grade	Price	No. 2 Yellow	No. 2 Yellow	Sorghum 2/

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Oct. 1966	Sept. 1966	Aug. 1966	Oct. 1965
Soybean Oil:					
Average price at crushing plant	Cents per lb.	10.9	12.1	13.9	11.4
Value from bushel of soybeans 1/	Dollars	1.17	1.29	1.49	1.22
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	82.20	88.40	97.90	70.80
Value from bushel of soybeans 1/	Dollars	1.95	2.10	2.32	1.69
Value of oil and meal from bushel of soybeans 1/	Dollars	3.12	3.39	3.81	2.93
Market price of No. 1 yellow soybeans at Illinois Points	Dollars per bu.	2.88	3.13	3.63	2.38
Spread between soybean price and value of oil and meal	Cents	24	26	18	55

1/ Based on assumption that a bushel of soybeans yields 10.7 pounds of oil and 47.5 pounds of meal for crop year 1965-66.

NOTE: This table is for statistical comparison only. It does not relfect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybean, soybean oil or soybean meal.

Grains: CCC dispositions 1/

1/ July 1-October 28, 1966 for wheat, rye, oats, barley, and flaxseed; October 1-28, 1966 for corn and grain sorghum; and September 1-October 28, 1966 for soybeans. 2/ Less than 500 bushels.

The Agricultural Stabilization and Conservation Service reported value, as of October 28, 1966 of feed grain certificates issued for crop-years 1964, 1965, and 1966 was $3,675,779,835. Sales against the certificate pools, by crop year were: 1965, $120,884,880; and to date in 1966, $2,035,217. These sales left a combined feed grain certificate value of $3,552,859,738 as of October 28, 1966.

1/ Payment rates for 1966-crop are included as follows: corn 30¢, barley 20¢ per bushel, grain sorghum 53¢ per cwt.; 1965-crop corn 20¢, barley 16¢ per bushel, grain sorghum 35¢ per cwt.; 1964-crop corn 15¢, barley 12¢ per bushel, grain sorghum 23¢ per cwt.

2/ Does not include $1.32 per bushel, the value of domestic marketing certificates paid to eligible producers on basis of projected production on 45 percent of participant's allotment.

3/ Does not include 75¢ (1964-crop 70¢) per bushel domestic marketing certificate and 30¢ (1964-crop 25¢) per bushel for export marketing certificate.

Grain Market News

GRAIN DIVISION — CONSUMER AND MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 45 — Hyattsville, Maryland 20782 — November 10, 1966

CORN AND SOYBEANS DECLINE

Cash grain markets showed a mixed trend during the period ending November 9. Corn, soybeans and rye reversed last week's gain and dropped to lower levels while winter wheat strengthened. Other grains showed little change during the period.

Winter wheat advanced 2-3¢ per bushel as producers and country elevators continued their strong holding attitudes. Mill demand was good while there was some pickup in export buying. Drought in large areas caused concern regarding the 1967 crop. Spring wheat declined 1-2¢ reflecting somewhat larger receipts. Demand was only moderate and trading was light. Durum prices were unchanged. White wheat went up a penny in the Pacific Northwest in limited export trading and slow country selling. Rye dropped 5¢ with larger offerings and little export interest.

Corn declined 4-5¢ as harvesting made good progress and receipts at markets increased. Demand continued only fair. Some of the corn coming to market was high in moisture. Oats held steady with little activity reported. Barley was down 2¢ at Minneapolis with more liberal offerings but went up a penny at Portland behind continued tight farm holding. Grain sorghum held steady at Ft. Worth but went up 2¢ per cwt. at Kansas City.

Soybeans declined 2-3¢ per bushel due in part to the large supplies and somewhat smaller exports. Although oil and meal prices showed little change the market was on the weak side. Flaxseed was unchanged with receipts light at Minneapolis.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Volume 14 No. 46 Hyattsville, Maryland 20782 November 18, 1966

WHEAT AND SOYBEANS ADVANCE

Cash grain markets showed an irregular trend during the week ended November 17. Wheat, soybeans and grain sorghum prices went up while corn declined with increased harvesting. Other grains showed little change.

Winter wheat advanced 2-3¢ per bushel -- the third consecutive week for net total gains of 7-8¢ in the three-week period. Receipts continued light as producers and country elevators were strong holders. Export interest picked up reflecting in part famine and drought conditions in India. Crop prospects for 1967 worsened over western Kansas and adjoining areas due to the lack of moisture. Spring wheat went up 1-3¢ reflecting a fair demand for smaller receipts. Mill buying was moderate with main strength from export interests. Durum dropped 4¢ at the top of the scale with demand for products limited. White wheat gained a penny in the Pacific Northwest with improved export interest and limited farm selling. Rye strengthened fractionally along with wheat as receipts continued light but world demand remained very limited.

Corn declined 2-4¢ per bushel with increased arrivals of high-moisture new-crop corn causing congestion. Export demand was steady but mill buying was very selective. Oats were a penny lower in spite of fairly light receipts. Barley prices were unchanged to 2¢ higher reflecting some export inquiry and fair demand. Grain sorghum advanced 2-5¢ per cwt. with active buying for reduced offerings.

Soybeans went up 8¢ per bushel during the week as producers continued to hold for higher prices. Receipts slowed as harvest was completed over large areas. Export demand remained good with oil and meal prices steady to higher. Flaxseed was unchanged in a slow market at Minneapolis.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

GRAIN: Commodity Credit Corporation estimated non-committed inventory

1/ There are no oats remaining in Ohio bins. Final cleanout report has not been processed to eliminate this normal gain of 285 bushels.

2/ 1,952 bushels of grain sorghum represents unrecorded deliveries to port, offset in All Other Postions.

NOTE: Total CCC-owned inventory are estimated to be overstated by 50 million bushels for wheat, 97 million bushels for corn, and 58.7 million bushels (32.9 cwt.) for grain sorghum because of unrecorded deliveries.

ASCS-IMD.

Wheat, barley, corn and grain sorghum: CCC sales or dispositions, export and domestic, by months, 1962-66
(All in 1,000 bushels except grain sorghum in 1,000 cwt.)

Grain Market News

GRAIN DIVISION CONSUMER AND MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 47 Hyattsville, Maryland 20782 November 25, 1966

GRAIN MARKETS QUIET IN LIGHT TRADING

Cash grain markets were quiet during the holiday-shortened period ended November 23. Wheat and corn strengthened while soybeans and flaxseed closed somewhat lower. Other grains showed little change.

Hard winter wheat gained a penny while soft red winter held steady. Mill purchases were limited to replacements while export trading was light. An increase in the prices during the middle of the period brought out some farm selling. However most farmers were holding as moisture conditions in much of the hard winter area continued critical. Spring wheat was also up a penny with some cutback in running time by mills as flour sales were light. Growers continued their tight holding policy. Durum was firm with moderate sales reported. White wheat lost 1-2¢ in the Pacific Northwest with export business narrow and fair country selling. Rye gained 3¢ on light receipts but new flour sales were slow. Shipping directions on earlier contracts were good.

Corn prices advanced 1-3¢ per bushel due in part to lighter receipts and to some improvement in demand. The market continued under some pressure of high moisture corn but overall domestic and export interest was strong. Oats gained a penny in sympathy with corn but trading was light. Barley was slightly easier with prices in the intermediate ranges down 2¢ from a week ago. Grain sorghum prices were unchanged to 1¢ per cwt. higher with demand good for moderate receipts.

Soybeans declined 1-3¢ per bushel at the close of the period after showing early strength. Trading was light with firm holding by producers limiting offerings. Soybean crushings during October at 43.9 million bushels were well above September but a little below October 1965. Flaxseed dipped 3¢ as some of the crushers were taking time out for repair.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

GRAIN: Commodity Credit Corporation estimated non-committed inventory

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Nov. 1966 2/	Oct. 1966	Sept. 1966	Nov. 1965
Soybean Oil:					
Average price at crushing plant	Cents per lb.	10.9	10.9	12.1	11.1
Value from bushel of soybeans 1/	Dollars	1.17	1.17	1.29	1.19
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	78.80	82.20	88.40	75.70
Value from bushel of soybeans 1/	Dollars	1.87	1.95	2.13	1.79
Value of oil and meal from bushel of soybeans 1/	Dollars	3.04	3.12	3.42	2.90
Market price of No. 1 yellow soybeans at Illinois Points	Dollars per bu.	2.88	2.88	3.13	2.49
Spread between soybean price and value of oil and meal	Cents	.16	.24	.29	.41

1/ Based on assumption that a bushel of soybeans yields 10.7 pounds of oil and 47.5 pounds of meal for crop year 1965-66.

2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybean, soybean oil or soybean meal.

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 48 Hyattsville, Maryland 20782 December 2, 1966

CORN AND WHEAT ADVANCE

Cash grain markets were featured by sharply higher corn prices with moderately higher wheat for the week ended December 1. Other grains fluctuated within narrow limits and closed at about last week's level.

Winter wheat advanced 3-4¢ per bushel reflecting continued dry weather over large areas and a good domestic and export interest. Indications of increasing famine in India with prospects for additional exports provided the main boost to prices. Although country selling was up a little, most farmers continued their strong holding policy. Spring wheat gained a penny with mills fairly good buyers although new flour business was slow. Mill buyers provided good outlets for durum wheat. White wheat was about unchanged in a generally slow market in the Pacific Northwest with little export business. Rye was weak most of the period but closed unchanged with a fair demand on the last day.

Corn advanced 4-6¢ per bushel at Omaha and Minneapolis and 12¢ at Chicago. Export demand was strong particularly at Duluth and Chicago. Merchandisers and domestic users were restricted from building up supplies by strong farm holding policy. Oats held unchanged to a penny lower as offerings increased and buying was only moderate. Barley was draggy at Minneapolis with prices unchanged to 2¢ lower but a strong demand boosted prices 3¢ higher at Portland. Grain sorghum finished 2¢ per cwt. lower at Kansas City with a more limited demand but held firm at Ft. Worth.

The soybean market was rather dull with light receipts reflecting limited country selling. Price changes ranged from a penny higher to a penny lower. The oil and meal market also was draggy with little change in prices. Flaxseed was unchanged in a slow market at Minneapolis.

Special Features

Grains - export prices at specified points	2
Wheat - inspected receipts by classes at selected markets, October	6-7
Grains - inspected receipts at selected markets, October	8-9
Grains - United States imports, October	10
Wheat - supply and distribution, monthly	10
Wheat, Hard Red Spring - distribution by protein bracket	11
Average farm prices, parity and support rates	11
Food for Peace Authorizations	12

1966 CROP SPRING WHEAT ... is unusually high in protein content on the basis of receipts tested at Minneapolis during the period August through November this year. Over 52 percent of the receipts during this period tested over 15 percent protein as against 28 percent in the same period last year and 33 percent for the 5-year (August-November) average. Only in 1964 when receipts tested 48 percent was the quality about as good as this year. Scattered reports from Kansas, Montana, Nebraska, Colorado and South Dakota also indicate a high protein content of this year's wheat crop. As expected, the premium for high protein wheat is considerably less this year than in other recent years. The premium for 17 percent protein wheat over ordinary averaged only 6¢ per bushel at Minneapolis in the four-month period - August through November. This compares with a premium of 34¢ for the same period last year, 12¢ in 1964 when the protein was relatively high and 16¢ per bushel in the same months of 1963. The premium for 14 percent protein wheat at Kansas City over ordinary averaged 7¢ per bushel during October-November this year as against a premium of 21¢ for the same months last year.

WHEAT SUPPLIES ... for export, milling or carryover totaled about 1.1 billion bushels on December 1 on the basis of current estimates of production and preliminary disappearance data. This is about 275 million less than at the same time last year and 750 million less than the 1960-65, December 1, 5-year average. Exports of 345 million bushels of wheat and 33 million bushels of flour in grain equivalent are running somewhat above last year.

Grains: Export prices basis prompt or 30-day shipment, December 1, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
			-- Dollars --

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

GRAIN: Commodity Credit Corporation estimated non-committed inventory

Grain Market News

GRAIN DIVISION CONSUMER AND MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 49 Hyattsville, Maryland 20782 December 9, 1966

WHEAT SELLS LOWER - MOST OTHER GRAINS ADVANCE

Cash grain markets showed a mixed trend for the week ended December 8. Wheat prices turned downward, while other cash grains generally closed on a firm or higher note.

Winter wheat lost 2-5¢ per bushel, reflecting a somewhat more liberal selling policy by farmers and less aggressive mill demand. The downswing was tempered to some extent, however, by the lack of moisture in the Southwest. An improved flour business and decline in farm sales near the close also helped to stem the downward pressure on cash prices. Spring wheat declined 1-3¢ but durum went up 5¢ as smaller receipts met good elevator and mill demand. White wheat was about unchanged in the Pacific Northwest where export business was quiet and selling by farmers continued good. Rye edged up a penny as a strike settlement of a Minneapolis area mill brought assurance of a continued grind.

Corn advanced 1-4¢ per bushel with good demand for lighter offerings. Oats ranged from 2¢ higher to 2¢ lower in quiet trading. Barley showed little change in continued draggy trading. Grain sorghum advanced 5-7¢ per cwt. behind good demand for light offerings.

Soybean prices fluctuated within a narrow range but edged up 1-2¢ per bushel for the week. Strength was attributed more to light offerings than to any marked increase in buying. Holding by producers also gave some support to the spot market. Flaxseed held steady in continued slow trading at Minneapolis.

AGREEMENT					
Bolivia	Dec. 1	-	Wheat flour	123,500 cwt.	477

1/ Hard red winter wheat. 2/ White wheat.

CCC WHEAT SALE TO ITALY ... was announced November 30, of 551,155 bushels for 750,000, primarily for use in school lunch programs for needy children. This sale was made under the Commodity Credit Corporation Charter Act. The Additional Italian need arises from the recent serious floods which destroyed large quantities of Italian farm products, some of which were intended for school lunch use. The authority provides for sales, at less than world market prices, of agricultural commodities for specified purposes such as feeding needy children or starting and maintaining school lunch programs in foreign countries. The price of wheat sold to Italy was $1.35 per bushel.

Grains: Export prices basis prompt or 30-day shipment, December 8, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

1/ July 1-December 2, 1966 for wheat, rye, oats, barley and flaxseed; October 1-December 2, 1966 for corn and grain sorghum; and September 1-December 2, 1966 for soybeans. 2/ Less than 500 bushels.

The Agricultural Stabilization and Conservation Service reported value, as of December 2, 1966 of feed grain certificates issued for crop-years 1964, 1965, and 1966 was $3,806,945,741. Sales agains the certificate pools, by crop year were: 1965, $720,884,880; and to date in 1966, $9,579,995. These sales left a combined feed grain certificate value of $3,676,480,866 as of December 2, 1966.

Grain Market News

GRAIN DIVISION CONSUMER AND MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 50 Hyattsville, Maryland 20782 December 16, 1966

CORN AND SOYBEANS DECLINE - MOST OTHER GRAINS ADVANCE

Cash grain markets were featured by lower corn and soybean prices for the week ended December 15. Most wheat prices were unchanged to higher with rye and grain sorghum also higher.

Hard winter wheat held about steady as dry weather continued over most of the central and southern Great Plains. Producers were not selling but demand from mills and export interest was light. Soft Red Winter wheat gained 2¢ per bushel. Spring wheat advanced 3¢ reflecting support from flour sales and limited offerings. Durum dropped 4-5¢ with increased marketing and lack of export business. White wheat was down 2¢ in the Pacific Northwest due in part to poor demand and fair country movement. Rye gained 3¢ at Minneapolis reflecting smaller receipts.

Corn prices dropped 3-4¢ per bushel due in part to larger market supplies and some disappointment in export movement. High moisture corn continues to be a problem. Oats gained a penny with offerings a little below buyers' needs. Barley was 1-2¢ higher in quiet trading and limited receipts. Grain sorghum went up 2-5¢ per cwt. as dry weather increased demand.

Soybean prices closed 2¢ per bushel lower at Chicago due in part to slow demand from both crusher and export interests. Despite the record soybean crop, stocks at terminals were about the smallest in ten years. Soybean meal strengthened while oil held about steady. Flaxseed held steady in slow trading at Minneapolis.

Special Features

Grains - quantity under price support	8-12

Sincerely wishing you a Merry Christmas

No report December 23, 1966 - Next issue December 30, 1966

1967 WHEAT AND FEED GRAIN PROGRAMS - Farmers wishing to participate in the 1967 wheat and feed grain programs will have a four-weeks signup period beginning February 6 and ending March 3, 1967. Signups for the 1967 Cropland Adjustment Program (CAP), which got under way between November 14 and December 1, also will conclude on March 3, 1967. Weekly national compilations of returns are planned. Reports on the first week of the signups will be available about mid-February.

EARLY DELIVERY OF RESEAL CORN SCHEDULED - Early delivery of 1962- and 1963-crop corn now in farm storage under reseal price-support loan, is being requested to meet the needs of the Commodity Credit Corporation, especially for disaster livestock feed. Farmers have the option of redeeming the loans and retaining ownership of the corn or of delivering the corn in payment of the price-support loan. County Agricultural Stabilization and Conservation (ASC) offices will issue delivery instructions to farmers on February 3. Any corn acquired by CCC as a result of this early delivery will be used to meet prior sales commitments and to meet needs of the emergency livestock feed programs in coming months. On November 30, about 89.5 million bushels of 1963-crop corn and 83.0 million bushels from the 1962 crop remained under loan.

Grains: Export prices basis prompt or 30-day shipment, December 15, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

1/ Abnormal quantity due to entry in bushels which should have been in cwt. Correction will be made.
2/ 1,952 bushels of grain sorghum represents unrecorded deliveries to port, offset in All Other Postions.

NOTE: Total CCC-owned inventory are estimated to be overstated by 58.6 million bushels for wheat, 75 million bushels for corn, and 43.8 million bushels (24.5 cwt.) for grain sorghum because of unrecorded deliveries.

Volume 14 No. 51 Hyattsville, Maryland 20782 December 30, 1966

WHEAT LOWER - OTHER GRAINS ABOUT UNCHANGED

Cash grain markets were generally on the weak side with wheat showing the most downturn for the seven-day period ended December 29. Grain sorghum was the principal exception as prices advanced.

Winter wheat declined 3-4¢ as prospects for the 1967 crop improved with good snow coverage over large areas. A record winter wheat crop of 1.28 billion bushels was indicated by December 1 conditions. Producer selling picked up as large purchase authorizations for export to India were issued. Spring wheat dropped 3¢ behind slow mill and export demand. Offerings continued moderate. Durum held steady with fair export activity. White wheat made gains of 9¢ early in the period in the Pacific Northwest with good export demand but closed only 5-6¢ higher after heavy country selling. Rye declined 3¢ in a very slow market at Minneapolis.

Corn prices were unchanged to a penny lower with cold and snow providing a moderate to good demand. Offerings continued adequate. Oats held steady with light receipts and fair demand. Malting barley showed little change in the Midwest, while feed barley declined on the West Coast. Grain sorghum went up 2-5¢ per cwt. behind good export and domestic demand.

Soybean prices declined 1¢ per bushel reflecting the slow demand from both crusher and export interests. Meal prices held steady, while oil closed slightly lower. Flaxseed was unchanged at Minneapolis with demand only fair.

Happy New Year

A 1967 WINTER WHEAT CROP ... of 1,283 million bushels was indicated, based on December 1 conditions, according to the Crop Reporting Board. If realized this would be the largest winter wheat crop in history, 9 percent more than the record high in 1958. Condition of the crop on December 1 was good to excellent across much of the Nation, except in the important Central and Southern Great Plains. There a dry fall restricted root development and plant growth, although most stands are intact. Acreage seeded to winter wheat this fall for harvest in 1967 totaled 54.1 million acres, the largest since the 57.1 million fall-seeded acres in 1952 -- the last crop seeded without acreage allotments. The 1967 all wheat acreage allotment was increased to 68.2 million acres, 32 percent greater than for 1966 with no acreage diversion provisions. This action offered farmers the opportunity to plant more wheat. And they did -- increasing their winter wheat acreage by 26 percent. The acreage of rye sown for all purposes in the fall of 1966 is estimated at 3.6 million acres, down 9 percent from a year earlier and 19 percent below average.

Grains: Export prices basis prompt or 30-day shipment, December 29, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
			-- Dollars --		
Duluth	No. 1 Heavy Northern Spring, 14% protein	1.98	-	-	-
Baltimore	No. 2 Soft Red Winter	1.87	1.54	3.05	1.41
Gulf	No. 1 Hard Winter:				
	Ordinary protein	2.02	1.54	3.02	2.39
	14% protein	2.14	-	-	-
Pacific Northwest	No. 2 Western White	1.82	-	-	1.29

1/ The export payment rate for wheat on December 29, was 11¢ per bushel for spring wheat from Duluth, 7¢ for soft red winter from Baltimore, 19¢ for hard winter from the Gulf, and 4¢ for white wheat from the West Coast.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

GRAIN: Commodity Credit Corporation estimated non-committed inventory
(All data in 1,000 bushels except grain sorghum in 1,000 cwt.)
